

Attic and Outdoor Digital TV Antenna

This compact antenna is designed for both attic and outdoor use. Its large deflector panel avoids interference and reflection of delayed signals, and its elements are anti-rust, waterproof, and weather resistant.

Product Overview

High-Performance Digital Reception

This versatile antenna is engineered for both attic and outdoor installations, providing a robust solution for receiving Full HD and local digital TV signals. Its compact design features a large deflector panel that effectively minimizes interference and signal reflection for clearer broadcasts. Built with durable, anti-rust, and weather-resistant materials, this antenna ensures reliable performance in various environmental conditions.

Technical Specifications

Frequency Range (UHF)	470-862 MHz
Impedance	75 Ω
VSWR (UHF)	3

Features

Key Features

- Compact extreme antenna design
- Semi-assembled for easy installation
- Large deflector panel to avoid signal interference
- Anti-rust and waterproof construction
- F-type connection for effective signal transmission

Suitable Environments	Attic, Outdoor, Weather-resistant
