

ATX Tower Computer Case

This computer case is a black tower design with two external 5.25-inch drive bays. It is suitable for building custom desktop computers for home or office use.

Overview

Professional ATX Tower Case

This black tower computer case is designed to house standard ATX or micro-ATX motherboards, offering a versatile foundation for custom desktop builds. It features a minimalist aesthetic suitable for both home and office environments, ensuring a clean and professional look. With integrated front-panel USB and audio connectivity, it provides convenient access for daily peripherals while maintaining adequate cooling and expansion capabilities.
