

Audio Alert Device

This device serves as a speaker, trumpet, and buzzer. It is designed for audio signaling and alert applications.

Product Overview

Professional Audio Alert Device

This high-performance audio alert device is engineered for reliability and clear sound projection in diverse industrial environments. Designed for seamless integration into safety systems, it offers robust construction to ensure long-term durability and consistent performance. Ideal for professional applications where immediate, high-decibel audible feedback is critical for site safety and operational efficiency.

Technical Specifications

Device Type	Audio Alert Device
Application Compatibility	Industrial Safety, Alarm Systems, Emergency Signaling
