

Audio Alert Transducer

This audio alert transducer emits a distinct sound for signaling and notification purposes. It is suitable for use in a variety of electronic devices and systems.

Product Overview

Professional Audio Alert Transducer

The Audio Alert Transducer is designed for high-performance sound signaling in industrial and commercial environments. This compact and efficient component ensures reliable audio feedback for various warning or operational systems. Built for durability and consistent output, it integrates seamlessly into existing electronics setups.

Technical Specifications

Available Models	SCPU02, SCPU03, SCPU04
Component Type	Audio Alert Transducer
