

Audio Amplifier

This audio amplifier is engineered for high-performance audio amplification. It provides robust power output and clear sound reproduction across a wide frequency range.

Product Overview

High-Performance Audio Amplifier

The DH6001-D is a high-performance amplifier engineered for demanding audio applications, ranging from car audio systems to home theater setups. Designed with high-quality components, it ensures long-lasting reliability and delivers clear, powerful sound reproduction across a wide frequency range. Its robust construction supports efficient heat dissipation, maintaining performance even during extended use.

Technical Specifications

Key Performance Features

- Robust power output
- Low distortion
- Efficient heat dissipation
- Versatile input/output connectivity

Model Number	DH6001-D
Applications	Car Audio, Home Theater
