

Audio and Video Signal Cable

This audio and video cable is designed for reliable signal transmission in various applications. It features multiple individually insulated conductors within a durable outer jacket, ensuring optimal conductivity and signal clarity.

Product Overview

High-Performance Signal Transmission

This audio and video signal cable is engineered for reliable, high-fidelity transmission in both professional and home environments. Featuring individually insulated conductors housed within a durable outer jacket, it ensures signal integrity and long-term performance. The use of high-quality copper conductors provides optimal conductivity, while color-coded internal wiring simplifies identification and installation.

Technical Specifications

Conductor Material	Copper
Insulation	Individual insulation per conductor
Wiring Identification	Color-coded
Application Suitability	Professional Audio, Professional Video, Home Audio, Home Video

Build Quality

Construction Features

- Individually insulated conductors
- Durable outer protective jacket
- High-conductivity copper core
