

Audio Buzzer and Trumpet Speaker

This audio component functions as a buzzer and trumpet speaker. It is designed for integration into various electronic systems requiring sound output.

Overview

Professional Acoustic Components

This versatile audio solution combines high-performance buzzer and trumpet speaker technology designed for precise industrial applications. Engineered with attention to compact mechanical dimensions, the unit provides reliable acoustic output for signaling and alert systems. Its robust design ensures consistent performance in professional environments requiring clear, audible feedback.

Technical Dimensions

Mechanical Specifications (mm)

Reference Point	Value
Main Diameter	65.8
Base Width	56.5
Depth Profile	48
Internal Span	43
Mounting Point A	33
Mounting Point B	30.5
Outer Edge	24
Secondary Depth	17.3
Secondary Width	12.5
Connector Pitch	12
Component Gap	11
Base Depth	10.5
