

Audio Buzzer Trumpet Speaker

This is a speaker, trumpet, and buzzer. It is designed for audio applications.

Product Overview

Professional Acoustic Signaling

The Audio Buzzer Trumpet Speaker is a high-performance acoustic device engineered for clear and audible sound projection. Designed for industrial and commercial signaling applications, this trumpet-style speaker ensures consistent performance in demanding environments. Its robust construction and efficient design make it an essential component for alarm systems, warning signals, and notification arrays.

Technical Specifications

Key Performance Metrics

110 dB

Sound Pressure Level

Component Type	Trumpet Speaker / Audio Buzzer
----------------	--------------------------------

Compliance and Standards

Certifications	CE, RoHS
----------------	----------

Application

Common Applications

- Emergency alarm systems
- Industrial warning signals
- Public notification systems
- Security hardware integration
