

Audio Loudspeaker with Mounting Frame

This loudspeaker component features a circular diaphragm for sound reproduction. It includes a square mounting frame, typically made of metal, with holes for secure installation.

Product Overview

High-Performance Audio Reproduction

This audio loudspeaker component is engineered for precise sound reproduction in professional electronic devices. Featuring a robust circular diaphragm constructed from treated materials, it delivers consistent acoustic performance. The unit is integrated into a durable square metallic mounting frame, designed for secure installation across various industrial and consumer electronics applications.

Technical Specifications

Diaphragm Material	Treated paper or composite
Frame Material	Metallic (Steel/Aluminum)
Mounting Type	Four-corner square frame

Compliance and Usage

Primary Applications	Audio Reproduction, Electronic Devices, Component Integration
