

Audio Transducer

This audio transducer serves multiple functions. It can operate as a speaker, trumpet, or buzzer.

Product Overview

Professional Audio Transducer

This audio transducer is designed to meet the rigorous demands of professional sound reinforcement and signaling applications. Built for clarity and reliability, the unit offers versatile performance suitable for diverse architectural environments and industrial setups. Its robust construction ensures consistent output, making it an essential component for high-quality audio projects.

Technical Specifications

Target Environments

- Modern Architectural Facilities
- Public Address Systems
- Industrial Signaling

Category

Loudspeaker, Buzzer, Trumpet Speaker
