

Audio Transducer Trumpet Buzzer

High-performance audio transducer designed for efficient sound reproduction. Features robust construction for durability and reliable operation in various environments.

Product Overview

High-Performance Audio Transducer

The Audio Transducer Trumpet Buzzer is engineered for efficient sound reproduction and reliable performance. Its robust construction ensures durability in various demanding environments, making it suitable for professional applications. Designed for clear and directional sound output, this unit offers a professional solution for audio signaling needs.

Technical Specifications

Model ID	X302
Device Series	134

Key Features

Application Compatibility

Audio Signaling • Industrial Sound Reproduction

Product Highlights

High-performance, Directional sound, Robust construction, Durable
