

Auger and Core Barrel Bit for Rock Drilling

This auger and core barrel bit is designed for rock drilling and piling applications. It is suitable for use with construction machinery in a variety of drilling and piling tasks.

Product Overview

High-Performance Drilling Solution

This auger and core barrel bit is engineered for versatile drilling and piling applications across a wide range of complex geological conditions. Featuring a modular design with removable pilot bits and interchangeable cutter teeth, it offers exceptional adaptability for various stratum. Its robust construction ensures efficient cutting performance, making it an essential tool for demanding construction projects.

Technical Specifications

Operating Diameter Range

400 mm

Minimum Diameter

3000 mm

Maximum Diameter

Design Features

- Removable pilot bits
- Easy disassembly
- Robust construction
- Efficient cutting action

Compatible Cutter Teeth

Flat teeth, Pick teeth, Bauer teeth

Application

Suitable Stratum

- High water content sand layer
- Silty clay
- Dense clay
- Sand and gravel layer
- Shell layer
- Iron sand
- High strength permafrost
- Strong weathered rock
- Soft stratum
- Complex stratum
