

Auger Drill Bit for Wood

This specialized drilling tool is designed for efficiently boring deep, clean holes in wood. Its defining feature is a spiral flute that pulls it into the wood as it rotates, while removing wood chips and debris.

Product Overview

Professional Auger Drill Bit

This specialized auger drill bit is engineered for efficient and precise boring of deep, clean holes in wood. Featuring a distinct spiral flute design, it provides a self-feeding action that significantly reduces the manual pressure required during operation. The integrated lead screw ensures accurate centering and starting, while the flutes effectively clear wood chips to prevent clogging during deep drilling tasks.

Technical Features

Key Design Features

- Spiral flute design for efficient debris removal
- Self-feeding screw tip for reduced manual effort
- Precision lead screw for accurate hole starting
- Optimized cutting edges for clean fiber shearing

Application

Drilling Application

Deep Boring • Clean Hole Drilling

Compatible Materials

Wood, Timber
