Product Overview

High-Performance Drilling Solutions

These conical bullet teeth are engineered for heavy-duty drilling and tunnel boring operations in extremely hard rock and concrete. Constructed with a durable AISI4142 steel body and a robust tungsten carbide tip, they are designed to deliver high efficiency and long-lasting performance in demanding construction environments. Their precision design ensures optimal material removal and consistent results for professional drilling applications.

Technical Specifications

Body Material	AISI4142 Steel
Tip Material	Tungsten Carbide
Tungsten Carbide Size	12*22 mm
Hardness	HRC48~52
Weight per Piece	0.5 kg

Quality & Standards

Quality Certifications	ISO 9001:2008
Industry Experience	Since 1999

Logistics

Packaging Details

- Inner: Plastic box
- Outer: Wooden case

Standard Delivery Time	7~21 days
