Product Overview

High-Performance Rock Drilling Solutions

These rock drill bits are engineered for heavy-duty drilling and tunnel boring in extreme hard rock and concrete environments. Featuring a hardened steel body paired with a durable tungsten carbide tip, they are built to withstand intense abrasion and impact. This design ensures effective rock fragmentation and efficient material removal, helping to maximize productivity and minimize downtime in demanding construction and mining applications.

Technical Specifications

Body Material	AISI4140 / 42CrMo
Tip Material	Tungsten Carbide
Carbide Size	22 x 33 mm
Hardness	HRC 48-52
Weight per Piece	1.2 kg

Certifications & Quality

Industry Experience

Quality Certifications	ISO 9001:2008
------------------------	---------------

Logistics

Packaging

- Plastic box (inner)
- Wooden case (outer)

Standard Delivery Time

7-21 days upon deposit
