

Auto-Darkening Welding Helmet

This auto-darkening welding helmet is designed to protect the eyes and face from sparks, spatter, and harmful radiation during welding. It features an adjustable shade range suitable for various welding processes, including MMA, TIG, and MIG.

Product Overview

Professional Auto-Darkening Welding Helmet

This high-performance auto-darkening welding helmet is designed to provide comprehensive protection for eyes and face against sparks, spatter, and harmful radiation. Featuring an advanced auto-darkening filter, the lens transitions instantly when an arc is struck, ensuring continuous eye safety while maintaining clear visibility. Built with durable, impact-resistant materials and adjustable headgear, it offers a secure and comfortable fit for professional-grade welding applications.

Technical Specifications

Supported Welding Processes	MMA, TIG, MIG
Model Number	H0013

Features

Safety Features

- Auto-darkening filter (ADF) technology
- Adjustable shade range for versatile application
- Impact-resistant construction
- Adjustable ergonomic headgear
