Product Overview

Professional Auto-Darkening Protection

This professional-grade welding helmet is designed to provide optimal eye and face protection against sparks, spatter, and harmful UV/IR radiation. Featuring an advanced auto-darkening filter (ADF), it instantly reacts to arc strikes while offering adjustable sensitivity and delay settings for versatile performance. Its durable, high-impact resistant construction and ergonomic, adjustable headgear ensure comfort and safety during extended welding and grinding operations.

Technical Specifications

Adjustable Settings

- Shade levels
- Sensitivity
- Delay settings

Suitable Applications

MIG, TIG, MMA, Plasma, Grinding

Power System

Solar-powered auto-darkening filter

Performance Metrics

Safety Compliance

UV Protection • IR Protection • High-Impact Resistant
