

Auto Darkening Welding Helmet

This auto darkening welding helmet is designed to protect the eyes and face from sparks, spatter, and harmful radiation during welding. The auto-darkening filter provides instant protection and clear visibility when an arc is struck.

Product Overview

Professional Auto-Darkening Solution

This auto-darkening welding helmet is engineered for high-performance protection, featuring a solar-assisted battery system with a 5,000-hour lifespan. Designed for versatility, it supports MIG, STICK, and TIG welding (rated at 10 Amps) with a rapid 1/15,000 second lens reaction time. The fully adjustable headgear ensures comfort during extended use, while variable shade, sensitivity, and delay controls allow for precise customization across various welding environments.

Technical Specifications

Lens Reaction Time	0.000067 s
Variable Shade Range	9-13
Independent Arc Sensors	2
TIG Rating	10 Amps

Power & Efficiency

Battery Life	5000 hours
Power Source	Battery Powered, Solar-Assist
Auto-Off Circuitry	15-20 minutes

Logistics & Packaging

Packaging Options

Packing Type	Quantity per Carton
Bulk Packing	16
Assembly Packing	6

Features

Customization

- Variable sensitivity control
- Variable delay control
- Fully adjustable headgear
- Custom painting colors
- Custom decal application
