

Auto-Darkening Welding Helmet

This welding helmet protects the user's eyes and face from sparks, spatter, and harmful radiation during welding. It is constructed from heat-resistant materials and features an auto-darkening filter lens.

Product Overview

Professional Auto-Darkening Welding Helmet

This high-performance welding helmet is engineered to provide superior protection against sparks, spatter, and harmful radiation during intensive welding tasks. Featuring advanced auto-darkening filter technology, the lens instantly adjusts to arc strikes to ensure optimal eye safety and visibility. Built from durable, heat-resistant materials with adjustable headgear, it offers a secure and comfortable fit for extended use in professional environments.

Technical Specifications

Key Safety Benefits

- Auto-darkening filter lens
- Spark and spatter protection
- Radiation shielding

Suitable Applications

Arc Welding, MIG Welding, TIG Welding

Material

Durable, heat-resistant composite

Headgear Adjustment

Yes
