Product Overview

Professional Auto-Darkening Protection

The D1585B welding helmet is engineered to provide comprehensive eye and face protection for professional welding applications. Featuring advanced auto-darkening technology, the helmet ensures optimal visibility and safety by instantly adjusting to welding arcs. Its durable, heat-resistant construction and adjustable headband are designed for comfort and reliability in demanding industrial environments.

Optical Performance

Switching Time

0.0001 s

Switching Time

Viewing Window Size 91 x 40mm

Light Shade 3

Dark Shade Range 9-13

Recovery Time 0.6 s

Compliance & Safety

Certified Standards EN379, EN169, EN175

Physical Specifications

Available Colors

Red • Blue • Black • Silver

Net Weight 500 g

Operating Environment

Operating Temperature	-5°C to +55°C
