

Auto-Darkening Welding Helmet

This auto-darkening welding helmet is designed to provide optimal eye and face protection during welding. It features adjustable shade range, sensitivity, and delay settings for use across various welding processes.

Product Overview

Professional Auto-Darkening Welding Helmet

This high-performance auto-darkening welding helmet provides comprehensive eye and face protection suitable for a wide range of welding operations. Built for durability, the impact-resistant design ensures safety and longevity in demanding environments. Featuring advanced adjustable shade, sensitivity, and delay settings, it offers the flexibility needed for precision work while maintaining a comfortable fit for extended use.

Technical Specifications

Operational Modes

- Welding
- Grinding

Protection Features

Auto-Darkening • Impact-Resistant • Full Face Coverage

Control Parameters

3 count

Operating Modes

Power System

Solar Powered, Battery Assist
