

Auto Darkening Welding Helmet

This auto darkening welding helmet offers optimal eye protection during welding operations. It is designed with adjustable shade settings, comfortable headgear, and a wide viewing area for various welding processes, including MIG, TIG, and arc welding.

Overview

Professional Eye Protection

This auto-darkening welding helmet is engineered to provide superior protection during intensive welding tasks. It features a wide viewing area and adjustable shade settings to accommodate various industrial processes including MIG, TIG, and arc welding. Designed for user comfort and safety, it effectively shields operators from harmful UV and IR radiation.

Technical Specifications

Safety Features

UV Protection • IR Protection • Auto-Darkening

Adjustment Capabilities

- Adjustable shade settings
- Comfortable ergonomic headgear

Compatible Welding Processes

MIG, TIG, Arc Welding
