

Automated Angle Steel Processing Line

This automated production line is designed for processing angle steel with precision. It features a heavy-duty milling machine and automated material handling components for efficient operation.

Product Overview

Automated Angle Steel Processing Line

This automated production line is engineered for high-volume processing of angle steel profiles. The system integrates a heavy-duty milling machine with a vertical spindle, automated material handling, and precise cutting and drilling capabilities. Designed for durability and efficiency, it utilizes advanced corrosion protection technologies to ensure long-term performance.

Technical Standards & Quality

Certifications

ISO 9002

Corrosion Protection

Rust Prevention Guarantee

30 Years

Rust-Free Warranty

Coating & Finishing Technologies

- Hot dip galvanizing process
- Zn-Ni alloy technology
- 3rd generation chromium passivation agent

System Capabilities

System Features

Automated Material Handling • Heavy-Duty Milling • Vertical Spindle • Continuous Operation • Safety Guarding
