

Automated Bottling and Packaging Line

This automated line integrates bottling, filling, capping, sealing, labeling, code printing, case sealing, bundling, and shrink film packing. It ensures efficient and consistent packaging for various products.

Overview

Automated Bottling and Packaging Solution

This comprehensive, automated production line is engineered to streamline the entire bottling and packaging workflow. By integrating multiple specialized machines into a single cohesive system, it ensures consistent output and high operational efficiency. The line is designed to handle every stage of the process, from initial filling and capping to final labeling, case sealing, and shrink film bundling.

System Components

Integrated Processes

- Bottling
- Filling
- Capping
- Electromagnetic induction sealing
- Labeling
- Code printing
- Case sealing
- Bundling
- Shrink film packing

Automation Level

Fully Automated • Integrated Line
