Overview

High-Efficiency Automated Cashew Peeling

This automated cashew nut peeling machine is specifically engineered to remove the inner soft skin from cashew kernels with high efficiency. Utilizing a dry pneumatic principle, the system ensures that kernels and skins are separated effectively and discharged through dedicated outlets. The machine is designed with shock-proof and breakage-proof internal components to maintain the integrity of the nuts during processing.

Technical Features

Key Benefits

- Effective separation of inner soft skin
- Shock-proof internal parts
- Breakage-proof design to protect kernels
- Automatic discharge of kernels and skins from separate outlets
- Low maintenance requirements

Operating Principle	Dry pneumatic peeling using compressed air
Power Source	Air compressed power

Service & Support

Warranty Period

1 Year

Machine Guarantee

Maintenance Policy	Lifelong maintenance and technical support provided
Service Highlights	Technical Support, Free Spare Parts (Defects), Lifelong Maintenance

Industrial Application

Target Industries

Food Processing • Nut Processing Facilities • Industrial Food Production
