Overview

Turnkey Citrus Processing Solution

This intelligent processing line offers a comprehensive, turnkey solution for the industrial extraction and refinement of citrus fruits. Engineered for high operational efficiency, the system manages the entire workflow from initial fruit pretreatment and grading to advanced juice extraction, pasteurization, and concentration. By integrating automated man-machine interface controls and enzymatic clarification systems, the line ensures high yields while preserving the original nutritional value and flavor of the final product.

Technical Capabilities

Processing Stages

- Fruit pretreatment and grading
- Full-fruit juice extraction
- Juice refining
- Essential oil extraction
- Pasteurization and UHT sterilization
- Juice concentration
- Enzymatic clarification and separation
- Automatic cleaning (CIP)

Compatible Fruit Varieties

Oranges, Lemons, Similar Citrus Varieties

Operational Features

Automation & Control

Man-machine interface control • Automated cleaning system • High automation degree

Output Product Types

- Concentrated orange juice
- NFC (Not From Concentrate) / Raw juice
- Essential oil (by-product)

Configuration

Customization Options

Feature	Customization Detail
Juicer Selection	3 types available
Oil Separation	Optional based on customer needs
Component Sourcing	Choice between import or domestic equipment
