Product Overview

Automated Lawn Care Solution

This advanced robotic lawnmower provides a fully autonomous grass-cutting experience designed for minimal user intervention. It features a sleek, low-profile design combined with integrated safety sensors to navigate complex outdoor environments effectively. Built for durability and efficiency, this unit maintains lawns with precision through programmable schedules and automated obstacle avoidance.

Key Features

Capabilities

- Autonomous grass cutting
- Automatic recharging
- Programmable scheduling
- Obstacle avoidance system
- Emergency safety stop
