

Automated Filling and Sealing Machine

This automated machine is designed for high-speed filling and sealing. It features a stainless steel frame and a programmable logic controller for precise control.

Overview

High-Efficiency Automated Packaging Solution

This automated filling and sealing machine is engineered for high-speed, continuous industrial operation. It features a robust stainless steel frame and a versatile volumetric filling system capable of handling powders, granules, and liquids. Equipped with a programmable logic controller (PLC), it offers precise control over filling volumes, sealing temperatures, and conveyor speeds to accommodate diverse packaging requirements.

Technical Specifications

Compatible Materials	Powders, Granules, Liquids
Frame Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)

Safety & Features

Safety Mechanisms

- Safety interlocks
- Transparent operator enclosures

Operational Capabilities

Adjustable Parameters

Filling Volume • Sealing Temperature • Conveyor Speed

Filling System	Multi-nozzle volumetric system
