

Automated Filling and Sealing Machine

This automated packaging machine is designed for high-speed filling and sealing. It is suitable for granular, powder, and small solid products in the food, pharmaceutical, and chemical industries.

Overview

High-Efficiency Automated Packaging Solution

This automated filling and sealing machine is engineered for high-speed, precise processing of granular, powder, and small solid products. Equipped with a multi-head weigher and advanced programmable logic controls (PLC), it ensures consistent dispensing accuracy and operational reliability. Designed for safety and performance, the unit features a protective enclosure and advanced sensors to minimize downtime across food, pharmaceutical, and chemical packaging applications.

Technical Capabilities

Key Features

- Multi-head weigher for precise dispensing
- Programmable Logic Controller (PLC) integration
- Advanced sensor-based control system
- Safety enclosure for operator protection

Compatible Product Types

Granular • Powder • Small Solids

Suitable Industries

Food Processing, Pharmaceuticals, Chemical Industry
