

Automated Filling, Capping, and Labeling Machine

This high-performance machinery is engineered for automated filling, capping, and labeling of various container types. Constructed from durable stainless steel, it ensures hygiene and longevity in demanding production environments.

Product Overview

Automated Production Solution

This high-performance machinery is specifically designed for the food, beverage, and cereal industries. Engineered for efficiency and reliability, the system integrates automated filling, capping, and labeling processes into a single, robust workflow. Constructed from durable stainless steel, it ensures optimal hygiene and longevity, making it an ideal choice for demanding, large-scale manufacturing environments.

Technical Specifications

Key Functions

- Automated Filling
- Automated Capping
- Automated Labeling

Model Numbers	CGFR323210, CGFR24248
Material	Stainless Steel

Performance & Control

Control System	Advanced control system for precise operation
Customization	Yes

Industry Suitability

Target Industries

Food • Beverage • Cereal
