

Automated Film Roll Slitting Machine

The auto roll film cutting machine is designed for precision slitting and cutting of film rolls. It features a programmable control system for automated operation, ensuring consistent and accurate cuts.

Product Overview

Automated Film Roll Slitting Machine

This automated film roll slitting machine is designed for precision slitting and cutting of various film rolls, offering consistent and accurate results for industrial applications. It features a programmable control system and a user-friendly interface for easy parameter setting and monitoring. Built for durability and stability, the machine includes essential safety features like emergency stop buttons and protective guards to ensure reliable operation in packaging and printing environments.

Performance Metrics

Operation Speed

12000 pcs/h

Pieces per Hour

Maximum Die Cutting Width	350 mm
---------------------------	--------

Technical Specifications

Power Requirements	AC220V; 1.9KW
Dimensions (L x W x H)	890 x 700 x 910 mm
Weight	120 kg

Logistics & Support

Warranty Period	12 months
Packaging Details	Strong wooden box in fumigation with hard PE film covered
