

Automated Floor Cleaning Robot

This automated robot is designed for cleaning floors in homes or businesses. It uses sensors to navigate and avoid obstacles while cleaning various floor types.

Product Overview

Professional Automated Floor Cleaning

The EC03 is a sophisticated floor cleaning robot engineered for both residential and commercial environments. It features an advanced high-sensitivity wide-angle lens for precise navigation and seamless obstacle avoidance. Integrated with a cloud-based intelligent remote management system, this robot offers streamlined operation and modern cleaning efficiency.

Performance & Features

Connectivity & Control

- Smartphone app control
- Dedicated remote control
- Cloud intelligent remote management

Cleaning Technology

Multi-surface cleaning, HEPA filtration, Intelligent navigation

Design & Build

Design Aesthetics

Glossy finish • Yellow and black • Circular form factor

Physical Characteristics

- Compact construction
- Lightweight design
- Integrated sensor suite

Power & Maintenance

Power System

Yes
