

# Automated Glass Lid Drilling Machine

This automated drilling machine is designed for creating holes in glass lids. The machine features a multi-station setup with precision drilling heads, a conveyor system, and a control panel for parameter adjustments.

## Product Overview

### High-Efficiency Glass Lid Drilling

This automated drilling machine is purpose-built for creating precise holes in glass lids within high-volume production environments. It features a robust, industrial-grade frame equipped with a multi-station setup and precision drilling heads to ensure consistent hole placement. An integrated conveyor system streamlines part handling, while the user-friendly control panel allows for easy parameter adjustments and real-time monitoring.

## Technical Features

### Hydraulic Components

- Hydraulic oil system
- Pressure monitoring

### Drilling System

Multi-station setup, Precision drilling heads, Automated conveyor system

### Control Interface

Integrated control panel for parameter adjustments and monitoring

## Safety & Construction

### Safety Features

Operator protection • Robust frame
