Overview

Automated Ice Cream Vending Solution

This high-performance automated ice cream vending machine is designed to deliver consistent, high-quality frozen desserts with minimal human intervention. Featuring a proprietary puffing system and advanced refrigeration, it ensures a superior taste profile that rivals traditional ice cream parlors. With integrated smart cloud management, remote fault diagnosis, and a robust mechanical arm system, this machine offers a reliable and profitable solution for high-traffic commercial locations.

Technical Specifications

Power Requirements

2000 W
Max Output

200 W
Standby Power

10 A
Current

Bare Machine Dimensions	960mm (W) x 880mm (D) x 1950mm (H)
Dimensions (with Top Sign)	960mm (W) x 880mm (D) x 2230mm (H)
Net Weight	360 KG

Performance & Capacity

Dispensing Modules

- 1 Milk Slurry/Powder Device
- 3 Jam Devices
- 3 Condiment Devices

Production Capabilities	14 Sundae Types, 120 Ice Cream Variations, 15s Preparation Time
