

Automated Lacquering System

This automated system applies lacquer to products with precision. It delivers consistent coating quality while minimizing manual labor.

Product Overview

Automated Lacquering System

This automated lacquering system provides a high-efficiency solution for professional document finishing and binding. Designed for industrial and commercial applications, it ensures consistent application of lacquering materials across various substrates. The system supports a wide range of colors and finishing styles, including gold, green, and purple, alongside standard binding materials like black and white combs.

Technical Capabilities

Compatible Binding Supplies

- Binding combs
- Black binding material
- White binding material

Primary Application

Professional Binding • Document Finishing

Available Finishes

Gold, Green, Purple
