Product Overview

Automated Mesh Scrubber Production

This industrial-grade automated machine is engineered for the efficient production of mesh scrubbers. It integrates a precise wire feeding system and advanced forming mechanisms to ensure consistent output quality. The unit is built with a robust frame for durability in high-volume manufacturing environments and includes a digital control panel for streamlined operational monitoring and adjustments.

Technical Features

Operation Mode	Automated
Construction	Steel Frame, Industrial Housing
Mobility	Yes

Control & Interface

Control System

- Digital Display
- Operational Buttons
- Parameter Monitoring

Maintenance & Accessories

Related Equipment	Roller grinding machine available for surface maintenance
