

Automated Packaging Machine

This packaging machinery is designed for efficient and reliable packaging processes. The machine is designed for industrial applications and is suitable for high-volume packaging operations.

Overview

Industrial Packaging Solution

The MSZ-95B is a high-performance automated packaging machine engineered for efficiency and reliability in industrial environments. Featuring a robust construction of metal and plastic, it is designed to handle high-volume operations with consistent output. The system includes an integrated material hopper, a secure molding and forming section, and an intuitive touchscreen control interface for precise monitoring.

Technical Specifications

Control Interface

- Touchscreen Interface
- Physical Control Buttons

Safety Features

Safety Frame • Enclosed Molding Section

Model Number	MSZ-95B
Construction Materials	Metal, Plastic

Performance Metrics

Application Type	High-volume industrial packaging
