

Automated Pipe Sticking Machine for Packaging

This automated machine applies adhesive to pipes and secures them in place for packaging. It features a stainless steel enclosure, integrated control panel, and adjustable leveling feet.

Product Overview

Automated Pipe Sticking Solution

This automated pipe sticking machine is designed to streamline packaging operations by applying straws to a wide variety of containers, including cartons, plastic cups, and plastic bottles. Utilizing an advanced PLC automatic control system, the machine efficiently manages product transport, straw trimming, and adhesive application. Its robust design ensures reliable, high-volume performance while significantly reducing labor costs and manual intervention.

Technical Specifications

Automation Capabilities

- Product transport
- Straw trimming
- Adhesive application
- Straw attachment
- Machine failure alarming

Control System

PLC Automatic Control

Supported Containers

Cartons, Plastic Cups, Plastic Bottles

Build & Design

Stability Features

Adjustable Leveling Feet • Pneumatic Connections • Integrated Safety Features

Enclosure Material

Stainless Steel

Interface

Touchscreen Display
