

Automated Pour Over Coffee Machine

This automated pour over coffee machine automates the pour-over brewing process. It features precise temperature control and adjustable coffee-to-water ratios.

Product Overview

Automated Precision Brewing

This automated pour-over coffee machine is designed to replicate the nuances of professional barista hand-drip techniques with consistent, repeatable results. Featuring a rotating water-dropping path and customizable brewing parameters, it allows users to achieve the perfect 'Golden Cup' extraction every time. The system integrates advanced technology, including an electronic scale for precise coffee-to-water ratios and adjustable temperature settings, all housed within a durable stainless steel and high-borosilicate glass construction.

Technical Specifications

| | |
|---------------------|---|
| Water Tank Capacity | 1 L |
| Carafe Capacity | 0.65 L |
| Materials Used | S.S 304 Stainless Steel, High Borosilicate Glass, High Temp Resistant Glass |

Key Features

Brewing Modes

- Automatic Mode
- Manual Mode

Specialized Functions

Descaling Function • Adjustable Water/Powder Ratio • Customizable Brewing Temperature • Rotating Drip Mechanism

Interface & Control

Control Interface

- LCD Display
- Electronic Scale Integration
- Stainless Steel Filter Holder
