Automated Production Line

Automated production lines streamline manufacturing processes. These systems integrate various stages to optimize output.

Overview

Automated Production Line Solution

This automated production line is engineered to streamline manufacturing processes, enhancing efficiency and consistency in high-volume environments. Designed for seamless integration into existing facilities, it offers robust performance and scalable output capabilities. By reducing manual intervention, the system ensures precise operation and minimizes downtime, making it an ideal choice for modern industrial production requirements.

Key Metrics

Production Capacity

500 pcs/h
Units per Hour

Technical Specifications

Automation Level

Fully Automated • PLC Controlled

Power Requirements	380V / 50Hz Three-Phase
Control System	PLC-based Integrated Controller

Operational Features

Maintenance Schedule

- Daily sensor calibration
- Weekly lubrication of moving parts
- Monthly software diagnostic check

Compliance & Safety	CE Certified, ISO 9001, Emergency Stop System

Rooms 05–15, 13A/F South Tower, World Finance Centre, Harbour City, 17 Canton Rd, Tsim Sha Tsui, Kowloon, Hong Kong
