

Automated Robotic Vacuum Cleaner

This robotic vacuum cleaner offers automated floor cleaning with advanced navigation. It efficiently cleans various floor types, featuring customizable cleaning schedules and automatic charging.

Product Overview

Automated Cleaning Solution

This automated robotic vacuum cleaner offers a comprehensive floor care solution by handling dry cleaning and mopping without human intervention. Equipped with intelligent sensors and advanced navigation, it transitions seamlessly across hardwood, tile, and carpet surfaces. Designed for convenience, the unit automatically returns to its docking station to recharge when the battery is low. The system includes mobile app connectivity, allowing for remote operation, schedule customization, and real-time monitoring of your cleaning progress.

Key Features

Filtration

HEPA Filter

Floor Compatibility

- Hardwood
- Tile
- Carpet

Cleaning Modes

Dry Vacuuming, Mopping, Automatic Self-Cleaning, Obstacle Avoidance

Smart Functions

Intelligence & Connectivity

- Advanced Navigation
- Mobile App Control
- Automatic Charging
