Automated Robotic Vacuum Cleaner

This robotic vacuum cleaner cleans floors autonomously and returns to its charging station automatically. It is equipped with both a suction nozzle and a rolling brush for versatile cleaning.

Product Overview

High-durability design featuring Japanese IMR film technology.

Smart Automated Cleaning Solution

This automated robotic vacuum cleaner is designed to streamline floor maintenance by operating independently. It features self-charging capabilities and offers versatile cleaning options including both suction mouth and rolling brush attachments. Built with advanced material technology, it ensures durability and consistent performance for commercial or residential environments.

Manufacturing Technology	IMR Thin Film, Japanese Technology

Technical Features

Cleaning Attachments

- Suction Mouth
- Rolling Brush Mouth

Automation Capabilities

Self-Navigation • Auto-Charging
