Overview

Automated Precision Grinding

This specialized machine tool is designed for the automated, two-sided sharpening of band saw blade teeth. Featuring dual grinding wheels and an integrated coolant system, it ensures consistent, high-precision tooth profiles for optimal cutting performance. Its robust construction and user-friendly adjustment mechanisms make it an ideal solution for sawmills, woodworking shops, and metalworking facilities requiring high-volume maintenance.

Technical Specifications

Safety Equipment

- Emergency stop button
- Wheel guards
- Orange safety guards

Grinding Operation	Two-sided grinding, Automated process, Dual grinding wheels
Cooling System	Yes

Operational Features

Adjustment Controls

- Handwheels
- Levers
- Adjustable workpiece holder

Work Area Lighting	Flexible gooseneck lamp
--------------------	-------------------------

Included Accessories

Included Tools

- Set of Allen wrenches
