Product Overview

Comprehensive Soap Finishing Solution

This automated manufacturing and packaging line is engineered for high-throughput production of toilet and laundry soap bars. The integrated system streamlines the entire finishing process, from initial mixing and refining to precision cutting and final packaging. Designed for efficiency and minimal manual intervention, it offers a scalable solution for consistent, high-quality soap production.

Performance Metrics

Production Capacity

1000 kg/h
Minimum Output

6000 kg/h
Maximum Output

Production Components

Included Processing Equipment

- Amalgamator/Mixer
- Refiner
- Three Roll Mill
- Plodder
- Cutter
- Stamper
- Auxiliary Equipment

System Features

Key Capabilities

Automated Packaging, Precision Cutting, Conveyor Integration, Quality Control Check-points, Modular Design
