

# Automated Straw Applicator

The automated straw applicator is designed for applying straws to containers. This machine ensures consistent straw placement and secure adhesion for various container sizes and shapes.

## Overview

### Professional Automated Straw Application

The YZTG-1 is a specialized automated straw applicator engineered for precision and efficiency in high-speed beverage production environments. It features robust stainless steel construction, ensuring long-term durability and compliance with strict food and beverage hygiene standards. With a capacity of up to 9,000 boxes per hour, this machine offers a reliable and cost-effective solution for streamlining your packaging lines.

## Technical Specifications

### Maximum Capacity

**9000 Boxes/h**  
Output

|                          |                       |
|--------------------------|-----------------------|
| Power Supply             | 3PH, 220V, 380V, 50HZ |
| Horse Power              | 4.5 KW                |
| Max Air Consumption      | 100 L/min             |
| Application Air Pressure | 0.4-0.6 Mpa           |

## Physical Attributes

|                     |                      |
|---------------------|----------------------|
| Overall Dimensions  | 1220 x 860 x 1300 mm |
| Machine Weight      | 300 Kg               |
| Conveyor Belt Width | 83 MM                |

## Operational Features

### System Capabilities

- Stainless steel construction
- User-friendly control panel
- Adjustable application speed
- Emergency stop safety system
- Protective enclosure

|           |            |
|-----------|------------|
| Feed Mode | Single Row |
