

Automated Volumetric Filling and Sealing Machine

This automated machine is designed for filling and sealing bags or containers. It features a hopper, a volumetric filling system with adjustable settings, and a sealing mechanism, all supported by a sturdy frame.

Product Overview

High-Efficiency Volumetric Filling and Sealing

This automated packaging machine is engineered for precision filling and secure sealing of bags or containers. It features a robust volumetric filling system with adjustable settings, making it highly adaptable for various granular or powdered materials. Designed for industrial reliability, the system includes an intuitive control panel for seamless operation and monitoring, ensuring consistent throughput in demanding production environments.

Technical Specifications

Core Components

- Material loading hopper
- Volumetric filling system with adjustable settings
- Integrated sealing mechanism
- Centralized control panel
- Industrial-grade sturdy frame

Machine Function	Automated Volumetric Filling and Sealing
Suitable Materials	Granular, Powdered

Performance

Operational Capabilities

1 Volumetric

Filling System Type

1 Digital Panel

Control Interface
