

Automated Weighing Filling and Sealing Machine

This automated machine integrates weighing, filling, and sealing into one compact unit. Designed for high-speed operation and precise control, it ensures consistent and accurate packaging results.

Overview

Automated Weighing, Filling, and Sealing Solution

This automated packaging machine streamlines the entire production workflow, from material feeding and precise measuring to filling, printing, and final bag sealing. Engineered for high precision and efficiency, it maintains stable performance while minimizing material damage during the process. Its cost-effective design makes it an ideal choice for businesses looking to optimize packaging operations for various granule and bar-shaped products.

Performance & Capability

Suitable Materials

- Candy
- Rice
- Nuts
- Granule-shaped products
- Bar-shaped products

Packaging Functions

Feeding, Measuring, Filling, Printing, Bag Sealing

Technical Features

Key Performance Metrics

520 W

Power Rating

Machine Features

High Precision • High Efficiency • Stable Performance • Cost-Effective • Automated Process
