

Automated Wheat Flour Milling Plant

This automated plant is designed for efficient milling and production of high-quality flour. The system integrates cleaning, conditioning, grinding, sifting, and packaging units with advanced machinery for optimal performance.

Product Overview

Professional Wheat Flour Milling Solution

This automated wheat flour milling plant offers a versatile, multi-layer processing architecture capable of daily outputs ranging from 10 to 500 tons. Utilizing advanced pneumatic grinding and square plansifter technology, the system ensures precise husk, core, and residue separation. Designed for efficiency, the plant supports both dry and wet grain cleaning processes while offering a turnkey experience from installation to technical training.

Technical Specifications

Daily Production Capacity

10 T/24h

Minimum Capacity

500 T/24h

Maximum Capacity

Milling Technologies

- 25 series duplex milling
- Automatic pneumatic grinding
- Square plansifter sieve separation
- Purification and husk-core-residue separation

Structural Configurations

Storey/Floor Structure, Steel Frame Structure

Service & Support

Service Package

- Custom system design
- Professional installation services
- Technical operator training
- One-year free warranty
- Lifetime maintenance support
