Product Overview

Professional Automated Window Cleaning

This automated window cleaning robot provides an efficient, streak-free solution for maintaining glass surfaces in both residential and commercial settings. Featuring intelligent gyro navigation and advanced sensors, it detects window frames and gaps to ensure comprehensive coverage. With a focus on safety, the device includes a robust vacuum suction system, an integrated backup battery, and a secure safety rope to prevent accidental falls.

Technical Features

Control Options

- Remote Control
- Optional Mobile APP

Navigation System

Gyro-based intelligent route planning

Safety Mechanisms

Vacuum Suction, Backup Battery, Safety Rope, Edge Detection

Design and Utility

Design

Compact square shape

Compatibility

Framed Windows, Frameless Windows

Maintenance

Removable and washable microfiber pads
