Overview

Intelligent Window Cleaning Solution

The HCR-01 is an innovative window cleaning robot designed for automated and efficient maintenance of glass surfaces. It utilizes advanced vacuum suction technology to securely adhere to windows, navigating both framed and frameless glass with ease. Equipped with intelligent sensors and a dual-cleaning microfiber system, this robot ensures comprehensive coverage while being controlled remotely for user convenience.

Technical Specifications

Intelligence & Safety

- Smart chip integration
- Vacuum cling technology
- Intelligent anti-fall system
- Edge and obstacle detection
- Remote control functionality

Safety Compliance

Safety rope included • Fall prevention

Cleaning Technology

Microfiber pads, Dual-cleaning system, Simulated handcrafted patterns

Usage Guidelines

Operating Warnings

Restriction	Requirement
Weather Conditions	Do not use in rain or humid conditions
Power Supply	Must be connected to power source during use
